About Me

MSc Eng. in Computer Science, specializing in React/Next.js and Node.js, with backend experience in Python (FastAPI/Django). I gained hands-on IT experience administering systems and automating processes in a production environment – from needs analysis through design to deployment. Outside of work, I've been a karate instructor and camp counselor for over 5 years, which taught me how to perform under pressure and stay disciplined.

Education

Master's degree
Designing IT systems and Computer Networks
Uniwersytet Warmińsko-Mazurski
2025 – 2026

Engineering of IT Systems
Uniwersytet Warmińsko-Mazurski
2021 – 2025

Skills

- Problem Solving
- Teamwork
- Independence and Motivation
- Time Management

Languages

- Polish – Native
- English – B2

Professional Experience

IT Specialist at the District Office

District Office in Lidzbark Warmiński

- I managed the operating systems and network infrastructure of the office and its subordinate units, ensuring the continuity of computer workstations across multiple locations.
- I diagnosed and resolved ongoing technical issues for employees (helpdesk), minimizing downtime in the office's operations.
- I independently identified an inefficient manual process for tracking employees' leave times and proposed its automation to my superiors.
- I designed and implemented an application in TypeScript that automated the conversion of leave times from minutes to hours, along with recording employee data and exporting results to .xlsx files.
- I conducted a full software development cycle – from needs analysis, through design and coding, to deployment of the solution in the office's production environment.
